The list of India's 110 "Bannable Pesticides", November 2018
(6 of these have been notified for phasing out – decisive action needed on 104 more)

1.	2,4-Dichlorophenoxy Acetic Acid	
2.	Acephate	
3.	Alachlor*	
4.	Aluminium Phosphide	Only for pest control, by govt undertakings
5.	Atrazine	
6.	Bendiocarb	
7.	Benfuracarb	
8.	Beta Cyfluthrin	
9.	Bifenthrin	
10.	Bitertanol	
11.	Bromadiolone	
12.	Butachlor	
13.	Captan	
14.	Carbendazim	
15.	Carbofuran	
16.	Carbosulfan	
17.	Chlorfenapyr	
18.	Chlorfluazuron	
19.	Chlorothalonil	
20.	Chlorpyriphos	
21.	Chlorpyriphos Methyl	
22.	Copper Hydroxide	
23.	Coumatetralyl	
24.	Cyfluthrin	
25.	Cyphenothrin	
26.	Dazomet	Not permitted on tea, 2008
27.	Deltamethrin (Decamethrin)	
28.	Diafenthiuron	
29.	Dichloro Diphenyl Trichloroethane (DDT)	Use in agriculture withdrawn, 1989
30.	Dichlorvos (DDVP)*	
31.	Diclofop-Methyl	
32.	Dicofol	
33.	Difenoconazole	
34.	Diflubenzuron	
35.	Dimethoate	

36.	Dinocap	
37.	Diuron	
38.	Edifenphos	
39.	Epoxyconazole	
40.	Ethephon	
41.	Ethion (aka Diethion)	
42.	Ethofenprox (Etofenprox)	
43.	Ethylene Dichloride and Carbon Tetrachloride mixture (EDCT Mixture 3:1)	
44.	Fenitrothion	Banned except for locust control, 2007
45.	Fenobucarb (BPMC)	
46.	Fenpropathrin	
47.	Fenvalerate	
48.	Fipronil	
49.	Fluazifop-p-butyl	
50.	Flufenoxuron	
51.	Fluopicolide	
52.	Flusilazole	
53.	Glyphosate	
54.	Haloxyfop-R-methyl 10.55%.EC(FI)	
55.	Hexaconazole	
56.	Hexazinone	
57.	Hydrogen Cyanamide	
58.	Imazethapyr	
59.	Iprobenfos (Kitazin)	
60.	Iprodione	
61.	Kasugamycin	
62.	Magnesium Phosphide Plates	
63.	Malathion	
64.	Mancozeb	
65.	Mepiquate Chloride	
66.	Metalaxyl	
67.	Metaldehyde	
68.	Methabenzthiazuron	
69.	Methomyl	
70.	Methyl Bromide	Only for pest control by govt orgs, 1999
71.	Methyl Chlorophenoxy Acetic Acid (MCPA)	
72.	Metsulfuron Methyl	
73.	Monocrotophos	Banned for use on vegetables, 2005

74.	Oxadiargyl	
75.	Oxadiazon	
76.	Oxydemeton-Methyl	
77.	Oxyfluorfen	
78.	Paraquat dichloride / Paraquat	
79.	Pendimethalin	
80.	Permethrin	
81.	Phenthoate	
82.	Phorate*	
83.	Phosalone	
84.	Phosphamidon*	
85.	Pretilachlor	
86.	Profenophos	
87.	Propanil	
88.	Propergite (Propargite)	
89.	Propetamphos	
90.	Propineb	
91.	Propoxur	
92.	Pymetrozin (FI)	
93.	Pyraclostrobin+Epoxiconazole	
94.	Quinalphos	
95.	Streptomycin + Tetracycline	
96.	Sulfosulfuron	
97.	Tebuconazole	
98.	Temephos	
99.	Thiodicarb	
100.	Thiophanate-Methyl	
101.	Thiram	
102.	Tolfenpyrad	
103.	Triazophos*	
104.	Trichlorfon*	
105.	Trifluralin	Banned except for use on wheat, 2018
106.	Validamycin	
107.	Zinc Phosphide	
108.	Zineb	
109.	Ziram	
110.	Captafol (Difolaton)	For seed dressing, only for export, 2001

(Note that this list includes DDT and Trifluralin which the Anupam Verma committee recommended to be banned in 2018, but which were not, by the Gazette Notification Order of 18.8.2018. It also includes Alachlor, Dichlorvos, Phorate, Phosphamidon, Triazophos, and Trichlorfon which the Gazette Notification of 18.8.2018 has ordered for phasing out by 31.12.2019. It also includes Fenitrothion which is currently banned except for locust control, the Anupam Verma committee having recommended the ban to be continued. The problem with “restrictions” on use on only particular crops or in particular sectors is that due to leakages and poor monitoring, and lack of awareness, these pesticides end up on crops).
